-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 11-18-2003 has been considered.

Drawings

2. The formal drawings are approved by the examiner.

Title

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Ichikawa et al. (5,918,090). The lid to selectively plug or unplug a discharge mouth of a developer container mounted to an image forming apparatus for replenishing a developer by Ichikawa et al comprises a body having a bottom portion and a sidewall portion defining an opening, wherein the bottom portion has an inner surface and an outer surface, and the sidewall portion has an inner surface and an outer surface; a ring; a lug having a first end and a second end defining a body portion;

Art Unit: 2852

and a plurality of arms connecting the lug and the ring, wherein the ring is sized to fit into a position at the sidewall portion such that when the ring is placed into the position, the second end of the lug and the inner surface of the bottom portion define a gap therebetween and the body portion of the lug facing away from the developer container when the lid plugs the discharge mouth (5A-5E). The lid further comprises an engaging portion formed around the opening and extending outwardly from the sidewall portion and sized to engage the discharge mouth of a developer container when the lid plugs the discharge mouth. The sidewall portion of the body comprises a cylindrical portion and a conical portion, wherein the conical portion adjoins the cylindrical portion and the bottom portion. The body has a plurality of annular ribs formed on the inner surface of the cylindrical portion. The lug is substantially extending along a central axis of the ring (5A-5E). The body portion of the lug has a larger diameter portion forming a conical recess therein proximate to the first end of the lug and a smaller diameter portion adjoining the larger diameter portion and the plurality of arms (5A-5E).
